1 Introduction

PROKO has been developed for the use of the Faculty of Computer Science and Engineering. The idea of the application is to unify and streamline the faculty's tutoring guidance by digitizing the guidance cards and reporting tools.

The person in charge of the system at the Faculty of Computer Science and Engineering maintains the management of user IDs and creates IDs for all tutors and their supervisors before the start of the tutoring season.

PROKO is designed to scale based on different screen sizes, and is available on PC, Android, and iOS mobile devices. It is a good idea to do the guidance session on a mobile phone. Viewing the group guidance base records, printing PDF etc. might be easier with your computer.

This document describes how to use the PROKO application in a PC browser.

It is also a good idea to tell your students that you are using such an application, so they don't wonder why you are constantly viewing your phone.

2 Logging in

- The application can be found at <https://proko.oulu.fi>
- The faculty will create and give your usernames for the application.
- After you have received your username and password, you can log in by filling in the login form.
- **Change your password the first time you log in to the application.**
- **If you misspell your username or password 5 times, the application will prevent further tries for 20 minutes, after 20 mins you can try again.**
- If you forget your password, contact prokohallinta@oulu.fi

Login

If you are having trouble while logging in, please contact the person controlling the PROKO - application. (prokohallinta@oulu.fi).

3 Settings

- By pressing the dropdown name -button in the right corner.

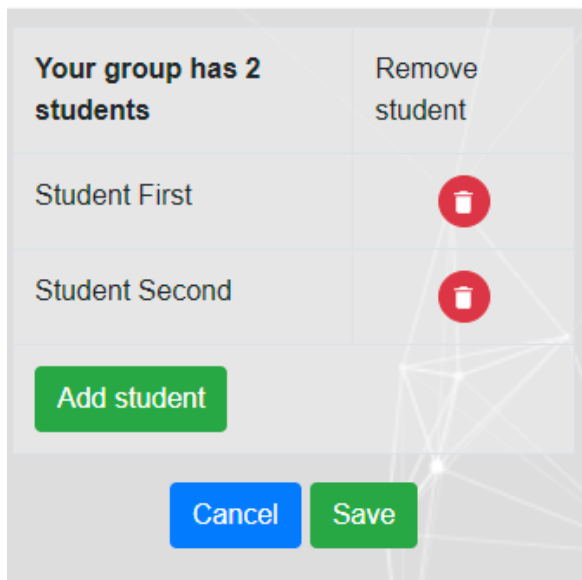

- Opens menu from where you get to the Settings page.

- From the Settings page, you can see your personal data and change the password.
- If you are having difficulties distinguishing green and red colors, you can try the colors setting if it helps. There are only two settings available, normal, and adjusted. Toggle settings by pressing the button in the Colors section.

3.1 Editing group

- If you select ***“Group”*** from the dropdown menu, you get to the page where you can edit your group.
- You can add or remove students from your group.

A screenshot of a web interface for editing a group. At the top left, it says "Your group has 2 students". To the right of this is a "Remove student" link. Below this is a table with two rows: "Student First" and "Student Second". To the right of each student name is a red trashcan icon. Below the table is a green "Add student" button. At the bottom are two buttons: a blue "Cancel" button and a green "Save" button.

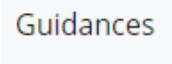

Your group has 2 students		Remove student
Student First		
Student Second		

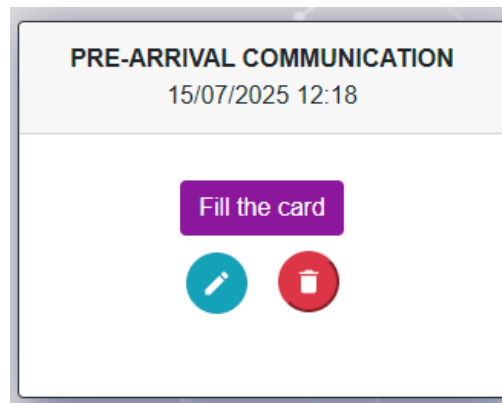

[Add student](#)

[Cancel](#) [Save](#)

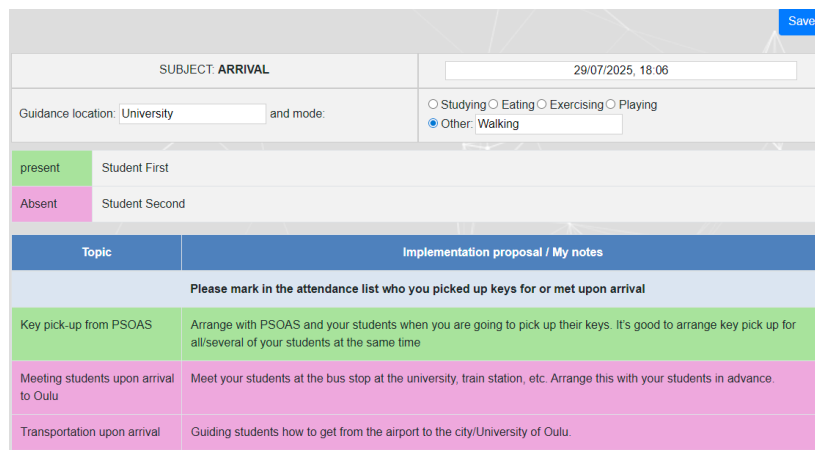

- To edit your group, press ***“Edit”***, add students by pressing ***“Add Student”*** and fill the student’s name, if you want you can delete students by clicking on the red trashcan icon next to the name. When the edits are complete, press ***“Save”***, and your group information will be saved in the database. If you wish, you can cancel the edit by pressing ***“Cancel”***.
- **The students must be added manually before you can return any tutoring cards.**

4 Arranging guidance

- Press “Guidances” from the top navigation bar  , you can begin by selecting the card fit for the tutoring session.
- Press “**Fill the card**” button to start filling the card.

- The card opens, fill in the information about time, location, and mode. Please use the real date.
- Time field is automatically filled in if the card hasn't been returned yet.

Topic	Implementation proposal / My notes
Please mark in the attendance list who you picked up keys for or met upon arrival	
Key pick-up from PSOAS	Arrange with PSOAS and your students when you are going to pick up their keys. It's good to arrange key pick up for all/several of your students at the same time
Meeting students upon arrival to Oulu	Meet your students at the bus stop at the university, train station, etc. Arrange this with your students in advance.
Transportation upon arrival	Guiding students how to get from the airport to the city/University of Oulu.

- Mark students who are currently attending the guidance session. You can do that by pressing the “**Absent**” or “**Present**” buttons. You can save the card at any point from the “**Save**” -button. However, saving the card in the middle of guidance session is not necessary. When you submit your card, all the information on the card will be saved.
- As the guidance progresses, mark the topics discussed by clicking on them and turning them green. Your supervisors then can easily keep track of what topics you have already discussed with the students. In addition, you can also see the topics that you did not have time to go through from the previous sessions and possibly make your own custom card to cover the missed topics later.

Topic	Suggestions / Own notes
Grouping	
Presentation of Student tutor and the tutor activities	
Presentation of group members	
Communication and information	
WhatsApp, Telegram, email, Tuudo, social media channels, mailing lists, IRC, Slack	Let's exchange contact information and create the necessary groups. Let's discuss about the other channels and, if necessary, return to them later. (Also Teacher Tutor)
Event calendars	Let's go together and check out the event calendar for the selected organization.
Additional topics discussed:	
+ -

- If you need, you can edit the card normally while you are holding the tutoring session. See part 6 for further information.

- After covering all the topics of the card, you can quickly add extra topics to **“Additional topics discussed”**.
- Add more additional topics by pressing the green button. 
- Remove the last additional topic by pressing the red button. 

Additional topics discussed:

13 / 500

Extra topic 1

13 / 500

Extra topic 2

- At the end of the guidance session, fill in the text fields for groups' wishes and homework assignments, if any, for future sessions.

The wishes and information needs of the group for the next time are as follows:

0 / 5000

Possible homework for the next meeting time (for group or PRO):

0 / 5000

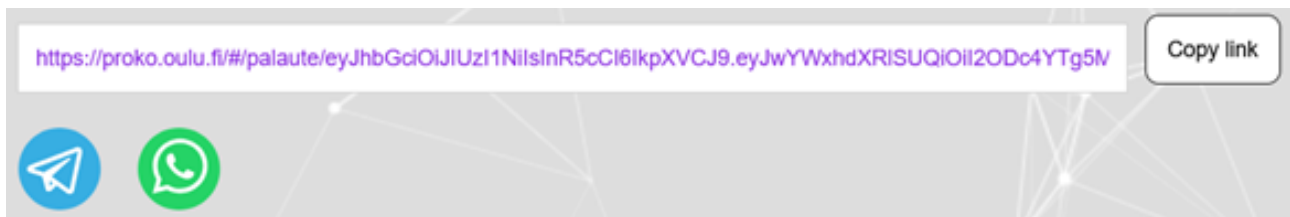

- Ask students to give feedback on the session.

You can ask for student feedback with the help of feedback link

[Get link](#)

- By pressing **Get link** –button, a link is created, and it appears in the box.
- The recommended way is to use **Copy link** -button. Notice that the link is very long and partially not visible (does not fit to text field entirely).
- Giving feedback is limited to only one feedback per person.

- If the guidance session is held remotely e.g., via Zoom, Teams, or Discord, you can share the link to the chat directly.
- With mobile phone the link can be shared directly, for example via student channels in Telegram or WhatsApp. Those applications can easily be installed to desktops or laptops too.

Students view when giving feedback.

You can anonymously give us feedback from the guidance session. Was there something you specially liked? Share it, so other groups can benefit from it too. Anything you did not like? How could we make it better?

Room to improve ☒ Ok ☐ Good

Give us your feedback:
0 / 1000

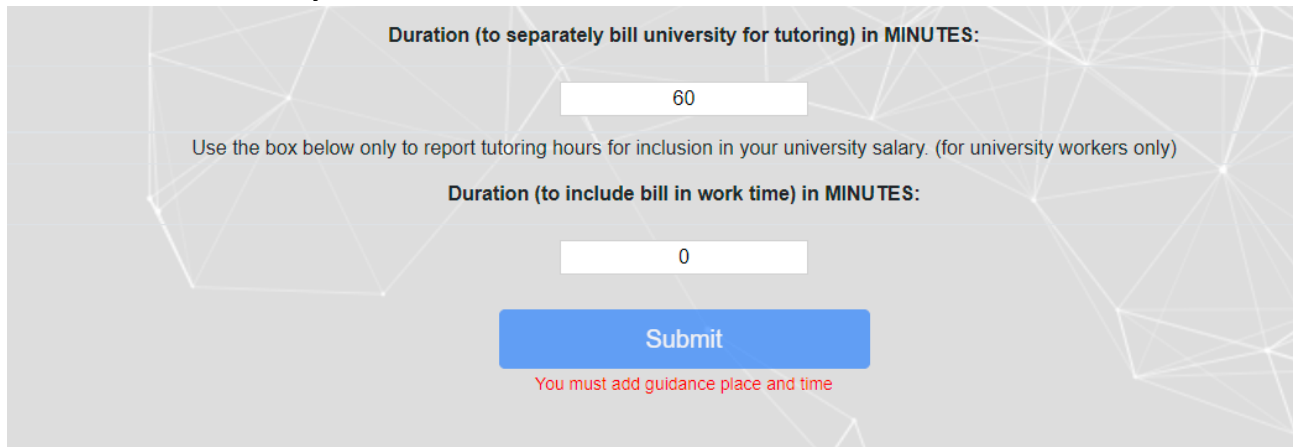

What was good in the session? Did something need improving? Did you get enough information about current topics?

Feedback left on the occasion is visible to supervisors.

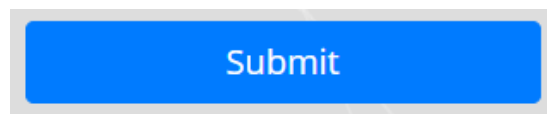

Tutors can also see the whole feedback directly from the returned card.

In the lower part of the card, you report the duration of the tutoring session.

- Fill the guidance session duration in **MINUTES**.
- **As many of the tutors are working for the university, there is an option to include hours in the university salary. This option should be used only by people who have ongoing (not tutoring related) contracts with the university and have communicated about the INCLUSION in the salary:**

A screenshot of a web form for reporting tutoring session duration. The form has a light gray background with a subtle geometric pattern. It contains two input fields for duration in minutes. The first field is labeled "Duration (to separately bill university for tutoring) in MINUTES:" and contains the value "60". The second field is labeled "Duration (to include bill in work time) in MINUTES:" and contains the value "0". Below the second field is a blue "Submit" button. A red error message "You must add guidance place and time" is displayed below the button. A line of text above the second field reads: "Use the box below only to report tutoring hours for inclusion in your university salary. (for university workers only)".

- **The default box for billing the tutoring is the upper one.** Either one, or both, can be filled.
- To be able to submit the card, you must fill the Guidance location, mode, and date.
- When all required have been filled, the Submit button will turn clickable and you can return the card by pressing the **“Submit”** -button.

A blue rectangular button with the word "Submit" in white text, centered on the button.

- If you notice that you missed something, or some data is wrong. You can fix it and return the card again. The last return remains in effect.
- Submitted cards can't be removed. If you wish to “remove” the billed hours, you can set the duration back to zero and resubmit the card.
 - Such a reason could be, for example, if a fellow tutor tutored your group while you were absent.
- Also, the student feedback can be collected after returning the card, if you did not have enough time or the feedback collection failed for some reason.

Student Second

- After returning the card, you can see the return date, duration, how many students were present, who were not present in red, and the overall feedback statistics.

5 Creating cards

- You can create up to 40 guidance cards.
- If you want to create another premade card, e.g., you accidentally deleted one of the premade cards, you can press ***“Add a premade card”*** -button.

 Add a premade card

- Select the card you want and click on it. If you want to cancel the creation, press the ***“X”*** at the corner or ***“Cancel”***.
- Only 1 copy of a premade card can exist at a time.

- If you want to create a blank card, press ***“Create new card”***.

Own card

Today 18:39

Fill the card

- Self-made cards can be identified by a star and pen and paper icon beneath the card’s title.

6 Editing card

- Editing a card allows you to make changes to existing card templates. It allows you to edit, add, and delete topics and instructions.

6.1 Editing card

1. Press the edit  button. The card opens and you can edit the content.
2. You can remove topics using the red – button  and add topics using the green + button . You can also edit the content of the text fields.
3. You can add a new subtitle using the blue + button . Removing the subtitle is done by pressing the red - button , the application requests a confirmation that you want to remove the subtitle, because it removes all the topics under the subtitle too. Remember to save occasionally if you are spending time editing the card and make sure that the session time does not run out.
4. “What did you change from the card field?” With this text field you can give valuable feedback regarding the future development of the guidance cards.

5. When you are finished with the editing, you can press **“Save”**, if you want to cancel the editing press **“Cancel”**.

SUBJECT: ALL STUDENTS TOGETHER		21/07/2021, 08:58	
Guidance location: and mode:		Studying ☒ Eating ☐ Exercising ☐ Playing ☐ Other ☐	
Topic		Suggestions / Own notes	
Gathering of all groups			
11 / 500 Joint event 		544 / 3000 Co-designed by SuperPRO together with Student Tutors. What event could this be linked to? Would some of the guild's bigger events be appropriate towards the end of the fall? Could this be at the beginning of a fairly early day, e.g. in the 2nd week? PROs would receive support from each other and master's students would also get to know other Tutors and students from different courses. Choose to agree on the options below or come up with something else. Think and agree together on a possible date well in advance and inform the - +	
Feedback and re-implementation			
118 / 500 Gather experiences of co-gathering and consider whether one could be arranged for a second time (benefits/challenges?) 		0 / 3000 - +	
What did you change from the card? 0 / 5000 Your feedback will be used to make the cards even better. 			
Save Cancel			

GET TO KNOW YOUR OWN GROUP AND UNIVERSITY

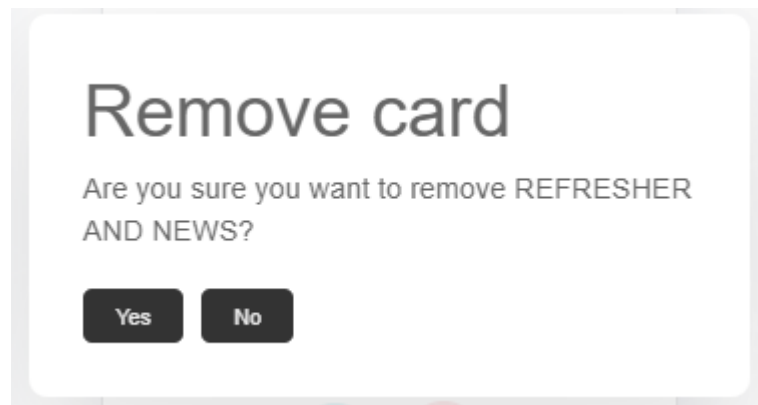

Today 18:34

6. Modified cards can be identified by pen and paper icon beneath the card's title.

6.2 Removing card

1. If you want to remove a card press  -button.
2. A window will open and asks for confirmation for removing the card. Press **“Yes”** if you want to proceed the removal process or **“No”** if you don’t.

6.3 Editing returned card.

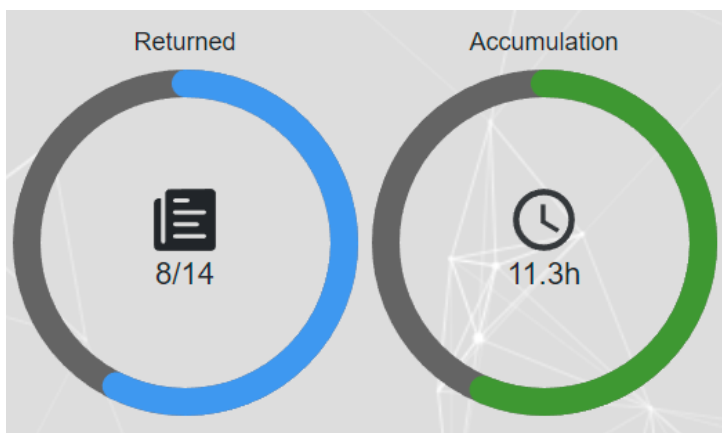

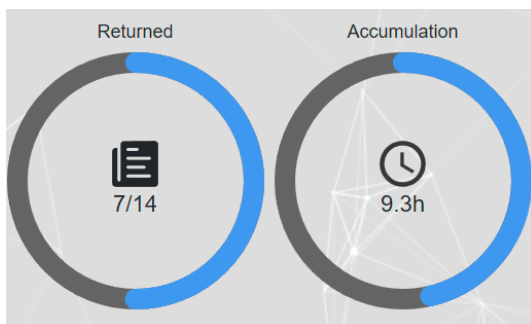

The tutor should optimally go through all the guiding sessions for each student in the group.

Open the returned card with  -button. The view of the returned card opens in the user interface. You can mark the attendees again or edit other information (place, time, mode, duration).

When you have finished editing, press  -button at the bottom of the card.

7 Monitoring your own progress

- You can monitor your progress with two indicators that show the returned cards and accumulated hours from the guidance sessions.
- Progress indicators are displayed in the **“Guidances”** and **“Settings”** pages.
- The **“Returned”** meter fills up when you have returned all the cards you created.
- The **“Accumulation”** meter fully fills up when you have held 20 hours of guidance sessions with the students. You can hold more than 20 hours of guidance sessions, and the meter will continue to register it. You should still be aware of the limitations regarding how many hours you can bill guidance for, so you do not do extra work for free unless you want to.
- The guidance work is completed when you have returned all the cards you wish to, and you have at least 10 hours of returned guidance. If you have created more cards than you are planning to give classes, delete the excess cards so your supervisors can see more clearly that you have finished the guidance work.

8 Trainings and Planning page

Please note! Use of this page can be disabled by the entity administering the system. If the page is not found in the top navigation bar, you may skip the instructions for using this page.

On this page, you record your own participation in organized training sessions as well as the separate planning work you have done for tutoring, documented in the form of a planning diary. At the beginning of the page, there is information related to billing. Billing limits are displayed, and your reported entries are totaled at the top of the page.

The planning diary can be found at the bottom of the page after the training sessions. The text section will display the text you have written and saved, and you can edit it at any time. The duration (calculate the total time you have spent yourself and enter it here) is also editable.

Please record all planning tasks in sufficient detail along with their durations (for example, creating a tutoring plan), and mention any other persons who may have participated. The duration of planning done in a group does not need to be divided by the number of participants.

9 Overview

- Overview page gathers your data for viewing in one place. You don't have to fill in the forms manually. The application updates the information based on the returned cards.
- To access the page, click on the **"Overview"** tab at the navigation bar.
- The base record provides dates, times, hours, presence, actualized subjects, billing/inclusion information. The information can also be downloaded to your device as pdf by clicking the **"Generate PDF"** -button.

Add new announcement to the message board. 0 / 500 The announcement written here is visible to other student tutors and supervisors.	

On the **“Announcements”** page, you can make announcements concerning matters related to student tutoring. The announcements are visible to other student tutors and super tutors. You can remove your own announcement by clicking **“Remove”** button. At the right side of the **“Remove”** button there is additional visibility info about your announcement. You can see a star in the super tutors’ announcement. The star is there to capture attention, so you won’t miss any important announcements. The announcements with 3 stars and colored backgrounds are made by Oulu university personnel in charge of the Proko project and often contain important messages.

11 Session duration

- Notice that the session time is limited and when the time runs out, the application guides you out from the application. The session can easily be renewed using the “*renew*”-button which comes visible when there is less than 30 minutes of session time left. You might lose some unsaved modifications if you get kicked out, but no further harm will happen.
